

## **Local Resource During the COVID-19 Pandemic**

### **About HelpingHands:**

Helping Hands is a community organization that connects volunteers with high-risk individuals across the United States during the COVID-19 pandemic.

### **What does NJ/PA Helping Hands do?:**

Our volunteers help pick up groceries and prescriptions, and check on members of the senior community virtually during this crisis. In addition, there is a team of highly motivated high school / college students who have signed up to volunteer with remote tutoring, as parents get busy with their regular job and are unable to find time to support their kids with school homework.
